③ Project Scope

Problem Statement :- Health Care and medicine tracking. & mental Health

 # Executive Summary -

As a Social and Health Consious Company We are trying to Save and help more humans and have a positive effect and impact on humans. So We are rolling out our app health4u in order to reach the main goal of becoming the india's largest Company Who Can reduce deaths and mental Health issues.

 # Findings -

The peoples With mental health disorders, Patients, health Consious peoples, Small Childrens, Old age peoples All peoples globally are allowed to Use our app.

Project description -

Health4U App Connects patients to doctors, therapists, dictitians, nurses and Coaches 24/7 through phone or Visits for many urgent needs. It also offers a variety of self guided programs that can be accessed at any time. During Registration, Users can choose their preferred language. The Company also offers American Sign language and many other languages as an option as a global app. When Users Connects With a health Care provider, a video Service Creates a three Way Connection with an interpreter Without any extra Charges. As Well as Company have build Small track bands for the people who have problem of loosing memory. There is a major problem in Villages that there are only few medicals in the village and Whenever there is a Urgency to the people who lives in village there is not ambulance present there. Our app has a Solution for both the major problem

Whenever there is a person getting accidental issue & villagers not finding ambulance our app has a Collision detector tracks the persons live location & the app connects that persons location with the nearest ambulance. The person who lives in village has the same solution. The villagers does not get medicine. Our app gives the patient fully fast medicine service.

Project Scope-

Our app are one of the leading sources of value for all the people who want an immediate reach towards their needful work to be done.

Why o want to take this project?

To reduce deaths, improve health of peoples and have a good & healthy impact on humans
